COMMENTS

Our school year is off to a great start! The Montessori “normalization” process is progressing quickly. Students are settling into their classroom routines, helping establish classroom rules and guidelines, participating in character education and team-building activities, and completing the beginning of the year assessment process that allows teachers to place each student into an individualized curriculum.

The Montessori materials are out on job rugs throughout the classrooms. Students seem eager to be working with these beautiful materials again. Almost all of our new Kindergarteners have come from Montessori Preschools, so the work being done by them in the classroom is a joy to watch. We really are almost through the normalization process in all of our classrooms!

The entire school community is watching the construction process on our campus expansion and is eagerly looking forward to our “move in” date. It has been fun seeing how the construction crews are removing the large rock outcroppings with hammering equipment, but have been very effective with minimizing the noise!
